DETAILED ACTION***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 6-12, 15-22, 27, 28, 32-38, 41-48, 52, 53, 57-63 and 66-73 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-9 and 11-18 of copending Application No. 10/206,131. Although the conflicting claims are not identical, they are not patentably distinct from each other because present claim 1 is merely a broader version of the subject matter covered by claims 11-18 presented in the '131 application (the use of the ubiquitous accelerometer to sense motion or mechanical contractions is old and well-known by those of ordinary skill in the art and therefore would have been considered a blatantly obvious design expediency –in any event, accelerometer use is referred to in claim 15 of the '131 application). Likewise, claims 27 and 52 of the present application are merely a broader version of the subject matter covered by claims 2-9, presented in the '131 application. Assuming the '131 invention receives a patent, the applicant would not be entitled to receive a patent for the generic or broader invention (*In re Goodman*, 11 F. 3d 1046, 29 USPQ 2d 2010 (Fed. Cir. 1993)).

Regarding claims with limitations of the type found in claims 11 and 12, those of ordinary skill in the art would have seen the particular landmark or fiducial points from which to base phase difference measurement to be a matter of obvious design. Clearly

Art Unit: 3762

any recurrent feature of the waveform signifying a contraction such as the onset of contraction or the peak of a contraction signal could have been used as long as the point selection was consistently applied from one accelerometer output to the other.

Regarding claim 15 and claims with similar limitations, the examiner considers it inherent that an accelerometer continuously senses motion during consecutive cardiac cycles by virtue of the fact that the piezoelectric material will by its physical nature produce an electrical signal indicative of motion any time the heart contracts.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 3-5, 13, 14, 23-26, 29-31, 39, 40, 49-51, 54-56, 64 and 65 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
